

# *LECET PROJECT TRACKING*

*A major goal of Minnesota LECET is to track project and job opportunities in order to increase market share for Union construction.*

Eligible Signatory Contractors may enroll for free project tracking services and receive weekly and monthly bid reports on construction projects bidding in the Minnesota and North Dakota region. Through extensive research with the support of National LECET, Minnesota LECET helps monitor thousands of future and active projects totaling billions of dollars in construction spending. There are two primary services being offered to Signatory Contractors: **Public & “Open” Market Projects**

The Cooperation Trust Tracking System (CTTS), offered only by Minnesota LECET, is a customized tracking software that utilizes the McGraw Hill Construction database listing of typically public projects in all work categories. By enrolling in this service, the Signatory Contractor will receive weekly project listings based on the contractor’s criteria of interest such as: project value, location, work category and more. A sample CTTS report is shown on the adjacent page 5 in this newsletter.

## **Industrial Projects**

The Industrial Information Resources (IIR) tracks projects bidding in the industrial construction area including: power generation, alternative fuel, metals & minerals, terminals/transmission, petroleum & chemical, pulp, paper & wood, food & beverage, industrial manufacturing and pharmaceutical & biotech. By enrolling in this service the Signatory Contractor will receive monthly reports on projects shown in the Minnesota & North Dakota region.

## **Special Project Reports**

Any Signatory Contractor may also request additional support from Minnesota LECET in specialized areas within the construction industry. LECET will utilize a variety of project research tools to assist the Contractor in obtaining additional information in areas such as: Pipeline Construction, Windfarm Construction & more.

### **Enrollment in LECET Project Tracking Services**

For CTTS Project Tracking reports, Signatory contractors may contact us at [info@mndlecet.org](mailto:info@mndlecet.org) or log on to [www.mnlecet.org](http://www.mnlecet.org) and print the Project Tracking Enrollment Form for CTTS located under the “Contractors Info” button. To request IIR project tracking services, please call 651-429-1600.
